My knowledge of currency trading extends over a 14 year period and has evolved from the old fashioned manual charting when I first started in 2002, to trading on multiple screens and entering the arena of automated trading. During this time, I have developed and shared many trading systems for free, and I have also assisted many new Traders through my various blogs and forum participation. This book is for those of you who are just starting to consider trading Forex but don't know where to start, given the abundance of information on the internet. It is THE first book to read to have an understanding of the very basics. I have deliberately kept the explanations simple and straightforward so everyone can understand it.
