TWA Flight 800 crashed into the Atlantic shortly after takeoff from JFK airport on July 17, 1996, killing all 230 passengers on board. Although initial reports suggested a terrorist attack, FBI and NTSB investigators blamed a fuel tank explosion. But skeptics have long questioned the official story, and new evidence has surfaced that suggests a widespread conspiracy...In TWA 800, historian Jack Cashill introduces new documents and testimonies that reveal the shocking true chain of events: from the disastrous crash to the high-level decision to create a cover story and the attempts to silence anyone who dared speak the truth.
