

Business Saviour - The Internet

The Internet is perhaps a business's greatest tool in the 21st Century. This book is focused on helping you avoid trouble with your broadband Internet connection. When your Internet connection has trouble it can cause you to lose customers and money. However, with the right degree of know-how YOU can fix over 60% of broadband troubles yourself - quickly and easily. For several years I worked for a major ISP here in the UK and talked with many thousands of business people when they had trouble with their broadband. I was surprised how few people treated the Internet as a major business tool. Just plugging it in and hoping it will work just does not safeguard your business. Written in plain English for the non-IT person, this ILLUSTRATED guide will help save you money and customers.
