

Malleus Maleficarum

First written in 1486 by zealous Inquisitors of the Catholic Church, The Witch Hammer came to be the witch-hunting handbook of the fifteenth century. Its main purpose was to refute doubts of the existence of witchcraft, though it proceeds to prove women more susceptible than men, as well as to outline procedures that allowed law enforcers to discover and convict witches. Because of the papal bull acknowledging the validity of this previously pagan belief, the persecution of alleged witches became widespread and brutal with the printing of Malleus Maleficarum on the recently invented printing press. Though some of the claims in this work are perhaps humorous to the modern reader, countless individuals lost their lives due to the prevalence of this book throughout late Medieval Europe, and today it can serve as a both a collection of superstitious folklore and a warning against mass hysteria and ignorance.
