

Eclectica: A Collection of Monographs, Essays, Poetry and Other Musings

This book is a compilation of writings covering myriad subjects and a number of years. None of the material presented here has seen previous public attention, though the main travel essay of approximately 10,000 words was offered to the Toyota Corporation as promotional material. It was never published to my knowledge. Other musings, including some short stories and a bit of poetry have circulated among family and friends only, and represent esoterica which every writer compiles at some point in his or her life but never really gets around to publishing. I hope you enjoy it and that it gives you some small insight into the mind of the author.
