

Corrosion Control for Offshore Structures: Cathodic Protection and High-Efficiency Coating

A variable game changer for those companies operating in hostile, corrosive marine environments, *Corrosion Control for Offshore Structures* provides critical corrosion control tips and techniques that will prolong structural life while saving millions in cost. In this book, Ramesh Singh explains the ABCs of prolonging structural life of platforms and pipelines while reducing cost and decreasing the risk of failure. *Corrosion Control for Offshore Structures* places major emphasis on the popular use of cathodic protection (CP) combined with high efficiency coating to prevent subsea corrosion. This reference begins with the fundamental science of corrosion and structures and then moves on to cover more advanced topics such as cathodic protection, coating as corrosion prevention using mill applied coatings, field applications, and the advantages and limitations of some common coating systems. In addition, the author provides expert insight on a number of NACE and DNV standards and recommended practices as well as ISO and Standard and Test Methods. Packed with tables, charts and case studies, *Corrosion Control for Offshore Structures* is a valuable guide to offshore corrosion control both in terms of its theory and application. Prolong the structural life of your offshore platforms and pipelines. Understand critical topics such as cathodic protection and coating as corrosion prevention with mill applied coatings. Gain expert insight on a number of NACE and

DNV standards and recommended practices as well as ISO and Standard Test Methods.
