

Gods and Galaxies

From author Aaron Smith comes a new and unique vision of space, romance and adventure.. Jason Stone leads a mostly quiet life as a very skeptical writer on occult subjects, making a good living and enjoying the solitude of the career hes chosen. But when a stunning young woman in a crowded store catches his eyes, Jason is thrown headfirst into a mystery he never could have anticipated. Her name is Natalie, or so she says, and Jason immediately knows shes different than anyone hes ever encountered before. Soon the dreams begin: visions of ancient Egyptian gods and the vast reaches of outer space. As the truth about Natalie unfolds, Jason is exposed to a new world of magic, wonder, and even love deeper than any hed ever imagined. And then the unthinkable happens, and Jason Stone must search within himself and find the strength to go where very few men have gone before. He must reach into the very depths of his soul to find the soldier within the scholar, the warrior within the man, and risk his sanity and even his life for the sake of a love for which he would willingly cross the stars. Aaron Smith has written in many genres, including mysteries, science fiction, fantasy, horror, war stories, and even a western. His short stories have appeared in numerous anthologies and he is the author of the short mystery novel Season of Madness.
