

God, Do You Exist?: The Questions of a Curious Agnostic

Why do we cling so tenaciously to the symbols and stories and doctrines contained in religion? Even more importantly, why do we let ourselves be driven to extremes of anger and hate and even murder in their defense? No doubt fear is the strongest reason. But, surely that fear is just the legacy from the reaction of our ancient ancestors to the mysteries they could see but not understand. Many of those mysteries have long ago been clarified by our advancements in knowledge or have just disappeared, all without the help of religion. Should not our religious beliefs change accordingly? Cannot our fears be overcome by knowledge? This book dares to question our so-called sacred beliefs. It holds up our doctrines to questions, not about their scientific or physical validity, but about their intrinsic failure to solve or justify or even explain the problems of suffering and pain and evil in this world. Many of our doctrines and the stories upon which they are based appear ineffective or even counterproductive when examined objectively. Maybe it's time they were subjected to closer scrutiny. This book does that in ways which go beyond conventional religious criticism.
