

Guardians of Shiism: Sacred Authority and Transnational Family Networks

For centuries, the Shii religious establishment has come to represent the most quintessential type of a transnational actor. How is clerical authority established and maintained across borders? This book explores the potential of transnational linkages in shaping leadership patterns in contemporary Shiism. Through the lens of two families of religious scholars, it compares the multifaceted roles played by clerics with narratives about the traditional system of religious authority, political organisations, and international charities. The book maps clerical networks and their encounters with communities and states across the Middle East, the Indian sub-continent, South-East Asia, and the West. This multi-sited approach aims to clarify the local and transnational dynamics that underpin clerical authority.
