 trader. This book explains a
 powerful trend-following day
 trading strategy for trading
 futures, stocks, ETFs and Forex.

 The
 Simple Strategy Is Easy To
 Understand And To
 TradeÂ

=====
 =====
 The Simple Strategy is very
 popular amongst traders for the
 following reasons: Clear Entry
 Rules When trading The Simple
 Strategy, theres no
 second-guessing. As you will see,
 the entry rules are based on
 indicators - and these rules are
 black and white. Either the
 MACD is above the zero line or it
 isnt. And either the RSI is above
 70 or it isnt. The entries are easy
 to identify and execute. Thats
 why this strategy is called The
 Simple Strategy Clear Exit Rules
 When trading The Simple
 Strategy youll know when to exit
 even before you enter the trade.
 So, you know exactly how much
 to risk on any given trade which
 is essential for precise position
 sizing and money management.
 Plus, you can put the trade on
 auto-pilot once your entry order is
 filled. This keeps trade
 management to a minimum. Its
 easy and simple. Taking
 advantage of small intraday
 trends These days trends are

short-lived. The times when you could enter the market in the morning and exit the market in the afternoon are over. These days the markets can turn on a dime. Low trading commissions and computerized trading have destroyed the nice and long intraday trends. However, with The Simple Strategy you can take advantage of the small intraday trends that we are seeing in todays markets. You dont need a sophisticated trading software If you want to trade The Simple Strategy, you only need a charting software with basic charting capabilities: Your charting software needs to be able to plot RANGE BARS, BOLLINGER BANDS, MACD and RSI. More than 90% of the charting software packages that are available today have these capabilities. Theres no need to buy any proprietary indicators or expensive charting software! In short: The Simple Strategy can greatly simplify your trading.=====

WARNING: This Book Is NOT For Everybody!

***Â=====

=====Do NOT buy this book if... .. You Are Looking For The Holy Grail Because it doesnt exist! When trading The Simple Strategy, there will be losses! Losses are part of our business as traders. The good news: If you follow the rules of The Simple Strategy, then you will make more money on your profitable trades than you lose on your losing trades. In fact, the risk/reward ratio of this strategy is 1 : 1.5, so you can expect to make \$150 for every \$100 you risk. ... You Want To Automate Your Trading Strategies The Simple Strategy will give you clear entry signals,

but its up to YOU to decide if you want to take the signal. As an example, I personally do NOT trade right into a major report. And I only trade the first two hours after the markets open, since most trends occur during this time. Makes sense?... You Are Absolutely New To Trading You should have a basic understand of charts and how to use them. And you need to know how to display indicators on your charting software. This book is NOT an introduction into trading. In this book you will learn how to configure your charts, when to enter a trade, where to place your stop loss and when to take profits. This book is not promising trading riches. But if you use The Simple Strategy as outlined in this book, you will put the odds in your favor with a proven trading strategy.
