

Christianity vs Critical Thinking: 10 Challenging Questions Every Believer (& Skeptic) Should Ask

Why this Book is Important In mid-January 2015, Saudi officials postponed the second set of a public flogging of 50 lashes, of 1000, because a convicted blogger would not have been able to survive, since the wounds from the first 50 lashes had yet to properly heal. The bloggers crime? He had been convicted of insulting Islam. (How dare he question the religion of his culture?) About 10 days prior, on January 7th, the offices of the satirical French magazine Charlie Hebdo was attacked by gunmen, killing eleven people inside, and one officer outside. The reason? The gunmen were retaliating against the magazine for publishing caricatures of the prophet Muhammad, founder of Islam. How can we question this insanity, without first questioning our own? But this book is not about Islam. In fact, this book is simply a set of 10 questions, plus one, about the Holy Bible. The relationship to Islam? To question one faith is to question them all. It should be self explanatory that no God, whose power exceeds the creation of the entire universe, hardly requires the assistance of a man to kill or punish another man. Yet here we are, century after century, killing in the name of a God. These 10 questions open an authentic exploration for honest truth in a world gone mad with spiritual violence. If we are to understand, survive, and end this madness, we must first have the courage to question if what is believed, in faith, is true. All it takes is asking a few questions in earnest; and in earnest, seeking not faithful answers but truthful

ones. And to that end, I offer these questions. About Those Answers When I started this book, I had a co-author, a lifetime devout Christian whom I have known all of my life, who was supposed to supply the answers to each question. But it was really an impossible task for one person who is anything short of an apologetic Christian scholar. She eventually acknowledged this, and I should have known better. Asking questions is far, far easier than answering them! (My bad.) And so, I offer you, if you're so inclined, the ability to supply answers to these questions at the web site <http://godanswers.me>. One question can be downloaded from the site, to allow you to see the tenor, scope, and context of these types of questions BEFORE buying the book. (I don't want anyone claiming surprise, or given to vitriolic commentary because it questions their faith. YES – that's exactly what it does!) This is an honest quest to own up and make good on some very serious issues based in religious faith. You are invited, be you skeptic or believer. Critical thinking is a process of testing-out thoughts and beliefs, for efficacy and truth. The true believer should have nothing to fear, while the skeptic would only clarify what may have before been nebulous. In either case, it not only inspires one to think, but to think critically about beliefs forged and maintained in faith. Sincerely Yours, Dorian Greer
