

Demystifying, Deconstructing and Decoding God: A Book with lots of Questions and a few Answers on GOD

Who or what is God, and does God exist, has been a topic of discussion since thousands of years. Religion and science have been at loggerheads about this. Each of us has his or her concept of God, which invariably has been given to us since childhood, but our parents and teachers. But who or what is God, really? What are his attributes? Can we connect to Him? Is he prone to manipulation? These, and many more such issues are discussed in this book, which attempts to bring together religion, science and spirituality, in our search for God. Written in a simple, often witty style, this book will give you enough food for thought to keep you occupied, engrossed and put you into an inquiring mindset. Once each of us starts his personal journey on the path to God, we find much more peace and joy than what we are currently experiencing. This book attempts to guide the readers to take the first step, in that direction.
