

Mental Health Issues of Older Women: A Comprehensive Review for Health Care Professionals

Discover the latest research on the mental health concerns of older women. Women are the primary consumers of mental health services, however, there is a paucity of research on their specific needs. *Mental Health Issues of Older Women: A Comprehensive Review for Health Care Professionals* presents a comprehensive overview for health care professionals, educators, and students on the study of mental health problems of aging women. This resource provides the latest research and informed perspectives by seasoned mental health clinicians. A wide range of mental health problems are explored, including dementia, cognitive impairment, alcohol abuse, schizophrenia, depression and anxiety disorders, traumatic and dissociative disorders, sexual and eating disorders, and personality disorders. *Mental Health Issues of Older Women* provides practicing therapists and counselors with a much-needed research update and a broad clinical perspective from respected experts. This book uses current psychiatric diagnoses as a framework to gain greater depth of understanding to address the mental health issues of older women. Students and health professionals will discover valuable information, inspiration, and encouragement in their work with middle-aged and older women who are facing mental health challenges. This volume provides extensive references. Topics in *Mental Health Issues of Older Women* include: the role of cognitive
