

# For Reluctant Atheists: Finding Your Path to Non-Belief

For those with a growing sense of disbelief in religion, leaving the faith is often a personal, current, and serious issue taking much thought and causing some level of anxiety. Beginning to doubt your religion can be merely disquieting or “in some fundamentalist communities” even life threatening. Parents and neighbors may apply social and financial pressures. Defenders of religion can present arguments for faith that have been refined over many centuries and may seem hard to refute. Many in this position then discover on the Internet a vast collection of videos, blogs, and social media pages dedicated to both belief and non-belief. But who can be believed? Who is a trusted authority? This book presents some of the current topics in the belief/unbelief debate and suggest some ways to think through the issues skeptically and rationally so that you can arrive at your own conclusions. It is not my intention to turn religious fundamentalists into atheistic fundamentalists. It is your call. I just hope to make the journey a little easier and rewarding.
