

Soothing the White Elephant

The primary focus of this book, Taming the White Elephant, is the establishment and successful management of the Graylyn Conference Center in Winston-Salem, NC. However, it is also the story of Life, Business, and the incorporation of fundamental core values and beliefs necessary to create a well-rounded, balanced approach to that overall success. Thomas Gilson knows the meaning of these. Providing the right environment for success is just as important as the content, steps, business plans, and marketing efforts. Establishing and putting into action the governing principles and management body of a life, or of a business, are required to set the standard and launch a pattern of success.
