

30 Minutes With...A Certified Public Accountant: Effective Tax Planning for the MicroBusiness

Tax planning is a key element in running a successful business. An effective tax plan for a business owner can be as valuable as an effective business plan. Effective Tax Planning for the MicroBusiness is devoted to tax savings, tax deferral, and tax planning strategies for the small business owner and self-employed individual with \$1 million or less in annual sales/revenue. These strategies have been boiled down into their key elements and presented in a simple, easy-to read format. As part of the 30 Minutes With... book series, this book is meant to be read in 30 minutes. The 30 Minutes With... series was designed to fill the needs of a fast-paced world in which time is the most valuable commodity. The goal of the series is to present existing information in a concise format, giving readers a comprehensive overview of a topic in a single 30 minute reading session.
