

The Foundations of Geometry and Religion from an Abstract Standpoint: Future Trend in Foundational Research on Mathematics and Religion

Future Trend in Foundational Research On Mathematics And Religion... Starting with the mindset of geometers the world religions are viewed through the concept of Congruence between religions. A comparison between geometry and religion is established. The foundations of geometry is discussed in the light of Euclidean geometry with emphasis on the axioms of congruence. The definition of Unified Universal Religion [UUR] is introduced by extending the notion of congruence to the realm of comparative religions. NIRVAN - the supreme state of enlightenment is achieved through SAMADAH - a state of trans is explored in the geometry of truth. Finally, Symbology, History, philosophy and Mysticism, the four fundamentals of religion are discussed.
