Updated for the 2016/17 tax year! This ebook is the followup in our 'Starting and running a successful limited company' series and it's designed to give you hints and ideas to apply to your business; to reduce both your corporate tax exposure as well as reducing your personal tax bill. It's aimed at existing contractors and consultants but it is informative for newly formed limited company owners too. It's by no means an instructional manual, but we share the most common strategies as well as some advanced tax optimisation tips to help you find ways to minimise your tax bill. We'll run through everything from good expense management techniques through to the more unusual ways you can ensure your tax liabilities are cut down to size.
