

The emotional terrorist and the violence-prone

In this important book, suppressed in England, Pizzey argues that not every battered woman is simply a victim. To successfully reduce violence, Pizzey convincingly shows that domestic violence prevention workers must distinguish between the emotional terrorist, addicted to pain and provoking violence, and those truly seeking escape from violence. This is the successor to *Scream Quietly or the Neighbours Will Hear*;, the first book on wife battering. It is a challenging must-read for all those dealing with family violence, policy-makers, family rights activists and anyone concerned about violence in society. The book contains the updated text of the original book, suppressed in England, minus outdated appendices, plus Pizzey's new research and conclusions comparing battered women and violence-prone women. A separate section describes the emotional terrorist;, a personality instantly recognizable to their targets.
