

# Blood Clots Etcetera: Psychobiography of a Systemiser Part 2: Outsider (Economy Class) Syndrome

This second part of Philip Wylie's psychobiography delves deeply into his insights and revelations post-â€œself-realisationâ€• at the age of 51. The underlying theme of this trilogy is genetics, eugenics, home truths and sinister family secrets. Philip learnt more about his life, family and the reality of the world-at-large in just four years up until 2016 than during the previous half-century when he was lost in a haze of misunderstandings. Philip stresses the importance of investigating our ancestry, including neurology, physical gifts and impairments, and much more. Our ancestors have much to teach us and we can maximize our chances of success by following our ancestors' favourable paths. Follow the guidance in this book, and you will give yourself the best possible advantage in life. If you feel like an outsider in your family, this book is especially important for you because it's likely that your research will unveil family gems, secrets and even lies. It's our responsibility to investigate the truth of our family background (as Philip did) before accepting and capitalizing on it. Are you ready for the most exciting adventure of your life? If so, let's begin!
