

The Spirituality of Shii Islam: Belief and Practices (Ismaili Texts and Translations)

Shiism is the second most numerous branch of Islam in the modern world, with between 130 and 190 million adherents across the globe. Shii Islam is becoming an increasingly significant and resurgent force in contemporary politics, especially in the Middle East. This makes a good and informed treatment of its fundamental spiritual beliefs and practices both necessary and timely. Mohammad Ali Amir-Moezzi is one of the most distinguished scholars of Shii history and theology currently at work, and in this volume he offers precisely such a wide-ranging and engaging survey of the core texts of Shii Islam. Examining in turn the origins and later developments of Shii spirituality, the author reveals the profoundly esoteric nature of the beliefs which accrued to the figures of the Imams, and which became associated with the latter's interaction between material and spiritual worlds. These beliefs were often designated as being *ghulat*, or extreme, by other Muslims, and as a result of such criticisms from within the tradition they have remained little known and much misunderstood. Furthermore, Western scholarship has tended to follow the lead of the earlier Islamic critics, viewing these concepts as deviant and marginal. The author shows, by contrast, how central an imaginative and creative spirituality was to the development of Shii Islam, as well as to classical Islamic civilization, as a whole. In this comprehensive treatment, the esoteric nature of Shii spirituality

is an essential factor in understanding Shiism.
