

## Fallacies of the Anti Hadith argument

In society today, there are many individuals and groups who seek to eliminate Islam in its pure and true form. The introduction of heretical innovations and anti Islamic customs have seen a moral decay in the hearts of the Muslims. These increasingly dangerous movements are actively growing and spreading their influence. Among the most heinous of ideologies being propagated today is the rejection of the Prophetic Hadith. Ignorance of the Islamic sciences is prevalent among the Muslim youth of today. The majority fail to differentiate between what is considered permissible and that which is impermissible. It is these vulnerable minds which the rejectors of Hadith wish to influence with their Western influenced philosophies and practices. It is an obligation on the learned to eradicate the falsehoods of such movements and educate the masses regarding the path of truth and guidance. This book attempts to explain the dangers of the anti Hadith ideology and seeks to demonstrate the essential nature of the Prophetic traditions in the practical lives of Muslims.
