

An Introduction to the Science of the Hadith: Kitab Marrifat Anwa Ilm Al-Hadith (Great Books of Islamic Civilization)

After the Quran itself, the hadith of the Prophet Muhammad form the most important foundation of Islamic thought. The hadith were accounts-usually brief-of the words and actions of the Prophet. As such, they were subjected to intense scrutiny by generations of Muslim scholars. Better known as the Muqaddima, Ibn al-Salah (1181-1245) composed this work while serving as the head of the Dar al-Hadith al-Ashrafiya in Damascus, one of the most prestigious institutions for the study of hadith in the Islamic world. The book provides a complete overview of the science devoted to the study of the words and actions of the Prophet Muhammad, and is also a guide to the terminology and techniques of the scholars of hadith as it summarizes most of the previous work on the subject and forms the basis of almost all later activity in the field.
