

# The Spirit Runs Through It

The Spirit Runs Through It is a review of the spirit [that] is manifest in the laws of the Universe as suggested by Albert Einstein. Along the way it develops mental tools, or constructs, with which to examine the mounting evidence of the Spirits activities. Beginning with the activities of actual primitive societies, the step-by-step approach leads into subjects which are at the heart of our modern civilization: Laws of Nature, Determinism vs. Free Will, Morality and Ethics, and Religion among others. Written by a layman for laymen, The spirit Runs Through It hopefully will provide tools for readers to examine their personal assumptions.
