

International Financial Management

International Financial Management is written based on two distinct parts: emphasis on the basics and emphasis on a managerial perspective. As capital markets of the world become more integrated, a solid understanding of international finance has become essential for astute corporate decision making. International Financial Management provides students with a foundation for analysis that will serve them well in their careers ahead. The decision-making process is presented through the text with the goal of teaching students how to make informed managerial decisions in an evolving global financial landscape.
