

# The Other Gods Earth: No Sin, No Death, No Evil: Part One: Introduction

In this new world there is no sin, no death and no evilâ€”only â€œgood and better.â€• This book will make you laugh...and cry. You will laugh at its juxtaposition of the silly and profound; you will cry when you return to this Earth.

This is my humble attempt to not only get you out of the boxâ€”but also get out of our worldâ€”into an alternate universe where all the laws of nature are different. Some terms and names will be the same but mean something quite different in this parallel but very different earth. This is a world of love, generosity, empathy, transforming into other life forms and making contributions to science, art, music, dance and poetry. All you have to do is first, suspend belief, and then open yourself up to this fantastic new world. Donâ€™t resist it; envision yourself living in it. What would a world look like if a God did not permit evil, suffering and death? Imagine waking up, driving to work, eating lunch, working, and interacting with your fellow employees in a world without envy, hate, greed, pride, lying or stealing. However, not everything is always perfect in this world. Accidents still happen. There is not always perfect agreement. Discussions and debates are cordial and informative. It is not a world without passion or humor; both are abundant. If you could enhance your â€œGod-givenâ€• abilities what would they be? Would you choose to be more intelligent, creative, athletic, or more sexual? You can choose any combination of ten traits. Alternatively you could choose to

have enhanced artistic, musical, dance, or verbal abilities. In my world, ESP/telekinesis is real and a common enhancement. If you could transform into other life forms, which creatures would you want to experience—a hummingbird, porpoise, or a cat? Or maybe something more esoteric such as a jellyfish, a coral reef or a single-cell paramecium? If it were possible would you become an angel and live as a fifth-dimensional being? Two of the most important things in life, most people say, are to find someone to love and to love what you do for a living. In this world, those are paramount. In this world, those goals are a reality for every human being. Your inclination is to dismiss this world as “boring”, or “we are now nothing but robots”, or “we’ve lost our humanity”. Is the measure of our humanity how cruel we can be to one another? Is it how much suffering and misery we must endure, ignore, or strive to avoid at all costs? Like my other books, the purpose of this book is not to seek universal agreement. It is to make you think. I. M. Probulos
