

Woman and Islam: A Theological and Legal Enquiry

This is a timely attempt to let the world know the facts about woman's high place in Islam. There are about 117 verses in Holy Quran which dealt with the issues of women. Before the advent of Islam, a woman was not a free agent in any civil contract. It was the right of her father, brother, cousin or any other male guardian. She was not free to marriage, whether she was old or young, widow or virgin. There was also a custom of inheriting a deceased man's widows by his heirs, who used to divide them among themselves like goods. The birth of a daughter was regarded as calamity because of the degraded status of women. It is against this background that we shall see the far-reaching and humane reforms brought about by Islam and Prophet Mohammad [pbuh]. Many improvements effected by Islam, particularly the way in which it has elevated the position of women. It is heartening that the situation is taking a turn toward improvement due to better education in general and in women in particular. This book will be benefited of a general reader and tell woman's high place in Islam.
