

Anger and Stress Management: What You HAVE to Know to Make it Work

I taught an anger and stress management program for many years, and found that clients frequently said things like, I've read a lot of self-help books, and taken several other courses, and this is the first time I've ever heard most of this stuff, and the whole thing finally makes sense! Why don't they teach this stuff in schools? There are a lot of anger and stress management courses and books out there, and they teach a lot of ways to do emotional management, but they DON'T teach what you need to know in order to make the material work! Here, you'll find what you need to know, in order to finally get control of your anger, stress, or other emotions. I've discussed this approach with physicians, psychiatrists, and counselors, and they always say something like, I never thought of it that way! It's amazing how much control of your emotions you can have, when you finally realize what's REALLY going on! The basic concept is that you can find plenty of anger and other emotional management techniques to try, but you have to learn to be AWARE of doing the emotion, EARLY ENOUGH, to be able to do it, before you're tranced out into the emotion, and it's too late. This book will guide you through exactly how to do that. And in a non-technical language and approach, as if you were in the classroom with me. You'll learn about the REAL nature of emotions - not something you have somewhere in your body, but as something you DO. Something you've learned how to do really well, and

can learn to do something else, something that works better. The concepts come from an eclectic mix of all kinds of therapies, but especially from Neuro-Linguistic Programming (NLP), addictions counseling theory, and behavior modification. This is the ONE, INDISPENSABLE, anger and stress management book that you need, if you want to work on changing how you do these and other emotions!
