

Menopause and Homeopathy: A Guide for Women in Midlife

As women grapple with the issue of whether hormone replacement therapy is necessary for them, they need a greater understanding of what the body is undergoing in menopause. Dr. Ifeoma Ikenze, an M.D. and a homeopath, writes from her experience of treating women daily in her Northern California practice. She explains the changes that begin to occur in the female body after thirty-five, and how homeopathy can help. Using patient cases as examples, Dr. Ikenze shows how physical, emotional, professional, and spiritual problems can challenge one's health and self-image. She incorporates the latest medical research and addresses the spiritual and emotional challenges of menopause, which most physicians overlook.
