A Dictionary of Gnosticism is a scholarly yet accessible guide that covers the people, mythology, movements, scripture, and technical terms related to this pre-Christian Western religion. It contains nearly 1700 entries, from Achiaram, an angel in the Secret Book of John to Zostrianos, a third-century Gnostic text, and is a reliable reference for the Nag Hammadi library and other Gnostic texts. An introduction explains who the Gnostics were and provides a whirlwind tour through the history of this captivating movement.
