

# The Transformation of a Doubting Thomas: Growing from a Cynic to a Professional in the Corporate World

2013 Honorable Mention at the New England Book Festival in the Business category. The author is a recovering cynic whose own professional growth is detailed based on lessons learned in over twenty years in a business environment. Toms experience in the corporate world proves that only a small number of leaders rise to the top. The experiences shared will teach the reader to work smarterâ€”not harderâ€”to thrive in corporate chaos where the current economic conditions have taught the employed and unemployed alike to simply try to survive. Everyone has room to grow. The target audience of corporate leaders, stagnant or disengaged employees, prospective employees, or simply individuals wanting to reach higher goals, is reinforced with tips ranging from common mistakes made in the workplace to techniques every leader should possess. The messages are simple and relate to anyone who has ever been in the work force. This book will strengthen the employee and employer relationship into an engaged and inspired partnership driving the business together, while re-energizing individuals to become self-aware of their own accountability to take action to grow. The evolution will inspire increased success and satisfaction levels, while expediting the climb up the corporate ladder. With the current global economy on the brink of recovery, opportunities are abound. The information will provide a competitive edge to individuals to effectively and quickly adapt to the changing professional landscape while

differentiating themselves from the masses. The reader will learn how to build a solid foundation and stand out amongst others. The growth opportunities go beyond the realm of the professional and corporate world. Personal and professional success is a combined entity that can be transformed as you take this journey. Ambitious leaders striving to get ahead, or stationary individuals looking to make a move, will be inspired to start taking action to reach his or her full potential. The goal for all readers is to build confidence and shape attitudes to become better people and enriched professionals.
